Health Guardian Services

Airdoc AI Retina Health Assessment System

By using artificial intelligence (AI) to analyze retinal images, the system gives objective health risk assessments. It is a non-invasive examination, to be completed in as fast as five minutes while the report can be printed at once. Suitable for people aged 18 or above, **it can identify 30 types of health risks, such as glaucoma, macular degeneration, cataracts, etc., and can screen more than 200 chronic diseases, such as diabetes, stroke, hypertension, cardiovascular diseases, etc..** If the results are found abnormal, you can ask a doctor for further diagnosis as soon as possible so as to nip serious illnesses in the bud.

Diagnosis and Treatment of Pain Disorder

By obtaining 3D images of body posture from front, back, left and right angles, it identifies incorrect posture and other spinal problems and then treats the root causes of the pain with:

(a) **FMP Treatment**; or

(b) **RF-IMT Treatment**

These treatments effectively help relax tense muscles and fascia, alleviate fatigue, and combat joint pain and other discomforts.

Healthy Growth Plan for Children

The plan is specially designed for children aged 6 or above. A nutritionist will provide a consultation of 2 sessions (for approx. 15-30 minutes per session). During the consultation, the nutritionist will provide guidance to the parents about the child's diet habits by measuring his/her height and weight. In the subsequent follow-up session, the nutritionist will address concerns by the parents and further adjust the dietary plan with **an aim to promote the healthy growth of the child.**
